## PROFILE

I am a Fullstack Developer focused on building responsive web applications with React and Angular and backend services with Node.js (Express) and SQL databases. My experience includes delivering full-stack features for a greenfield accounting system and portfolio projects such as e-commerce and API-driven applications, with an emphasis on secure authentication, clean code structure, and collaboration in agile teams. I also use AI tools like Claude Code and GitHub Copilot to speed up development, testing, and problem-solving.

## TECH STACK

JavaScript (ES6+)

TypeScript

React

Angular

Agentic Coding (Claude, GitHub Copilot, Cursor)

Node.js

SQLite

Git

REST API

Agile

Tailwind CSS

HTML5/CSS

UX/UI Principles & Accessibility (WCAG)

## WORK EXPERIENCE

### Full-stack Developer (Internship), AriaSoft Studios

2025 – 2026

Developed a greenfield accounting system for web, desktop, and mobile platforms. Enhanced frontend features using Angular for invoice, payment, and customer management workflows. Created and documented RESTful API endpoints with Node.js and Express for core features. Optimised a normalized SQLite3 database schema for invoices and payments.

- Implemented JWT-based authentication and role-based access control.
- Integrated frontend applications with backend services across Electron and Ionic clients.
- Wrote automated tests for backend API endpoints to minimise regressions.
- Participated in agile processes including sprint planning and code reviews.

## Technical Web Editor, UpWeb Sverige

2019 – 2024

Managed and maintained websites, producing and publishing technical content and front-end updates using CMS tool. Implemented responsive templates.

## Banking Operations Specialist (Personal Banking), Idea bank

2013 – 2015

## Credit Specialist, Platinum bank

2011 – 2013

### EDUCATION

## YH-examen in Frontend developer , EC Utbildning

AUG 2024 – MAY 2026

Intensive, project-based frontend education focused on building modern, accessible web applications using React, Angular, TypeScript, and JavaScript (ES6+).

- Full-stack Development: Built multiple projects (e-commerce, API-driven apps) using Node.js (Express) and SQL for persistent data storage.
- UI/UX & Accessibility: Emphasized responsive design and WCAG standards to ensure high usability across devices.
- Professional Workflow: Practiced agile methodologies, Git/GitHub version control, and peer code reviews.

## Master's degree in finance and management, Lviv Institute of Banking of Banking University of the National Bank of Ukraine

Business and management background that strengthened analytical thinking, structured problem-solving, and working with data-heavy processes — skills that support modern software development, debugging, and product-oriented decision-making.

## Bachelor's degree in business administration and economics, Lviv Institute of Banking of Banking University of the National Bank of Ukraine

Built a foundation in economics, data analysis, and business processes, which translates well to understanding user needs, technical tradeoffs, and practical product development in fullstack environments.

### LANGUAGES

English

Ukrainian

Swedish

Polish

### MY PORTFOLIO OF WEB PROJECTS

## Lokal bokforingsplattform for smaforetag

NOV 2025 – APR 2026

Designed and developed a local-first desktop accounting MVP for small businesses using Angular, Electron, Node.js, Express, and SQLite. Implemented JWT-based authentication, invoice and expense management, receipt attachment uploads, and core financial summary features including income, expenses, and balance. The project emphasized secure local data storage, structured full-stack architecture, and the development of a practical, user-oriented prototype.

GitHub: <https://github.com/OS136/accounting-platform>

## **Portfolio Website**

FEB 2026

Built a personal portfolio website with React, TypeScript, and Tailwind CSS, featuring responsive design, GitHub repository integration, contact functionality, and automated deployment with GitHub Pages.

GitHub: <https://github.com/OS136/portfolio>

## **Freaky Fashion, E-commerce Application**

AUG 2024 – OCT 2025

Built multiple versions of an e-commerce application across school courses using HTML/CSS, Angular, React, Express.js, ASP.NET Core, Tailwind, SQLite, and SQL Server. Implemented product listing, search, filtering, product details, admin features, and backend API functionality, strengthening both frontend and backend development skills.

GitHub: <https://github.com/OS136/freaky-fashion-back-end-2>

*Note:* Full functionality requires running the backend locally.

## **Retrendo, Team E-commerce Project**

DEC 2024 – FEB 2025

Collaborated in a team to develop a server-rendered e-commerce web application using Express.js, EJS, SQLite, and JavaScript. Contributed to features such as product pages, search, favorites, cart and checkout flow, and was responsible for Git workflow, repository organization, and pull request coordination.
